About the course Coronary Artery Disease treatment modalities

Coronary Artery Disease course, in this course we will explore the intricacies of CAD, delving into its pathophysiology, risk factors, diagnostic techniques, and treatment modalities. Through comprehensive study, participants will gain insights into the latest advancements in CAD management, including pharmacotherapy, surgical interventions, and lifestyle modifications. Furthermore, we will discuss emerging therapies and future directions, empowering attendees to contribute effectively to CAD prevention and treatment strategies. Join us to deepen your understanding of CAD and enhance your clinical practice.

Medical Category's Courses

Course Lesson(15)

Lesson 1 : **ECG Interpretation Clinical Medicine**

Lesson 2 : **Arrhythmias Clinical Medicine**

Lesson 3 : **Atrial Fibrillation Clinical Medicine**

Lesson 4 : **Coronary Artery Disease Clinical Medicine**

Lesson 5 : **Congestive Heart Failure Clinical Medicine**

Lesson 6 : **Cardiomyopathy Clinical Medicine**

Lesson 7 : **Pericardial Diseases Clinical Medicine**

Lesson 8 : **Heart Sounds Murmurs Clinical Medicine**

Lesson 9 : **Valvular Heart Diseases Clinical Medicine**

Lesson 10 : **Aortic Diseases Clinical Medicine**

Lesson 11 : **Hypertension Clinical Medicine**

Lesson 12 : **Hyperlipidemia Clinical Medicine**

Lesson 13 : **Peripheral Arterial Disease Clinical Medicine**

Lesson 14 : **Shock Clinical Medicine**

Lesson 15 : **Syncope Clinical Medicine**
