About the course Chronic kidney disease diagnosis

Chronic kidney disease diagnosis course, in this course participants will gain comprehensive knowledge of diagnosing chronic kidney disease (CKD). Covering various diagnostic methods including laboratory tests, imaging techniques, and clinical assessment, learners will understand the criteria and staging systems used to classify CKD. Emphasis will be placed on interpreting renal function tests, assessing albuminuria, and identifying underlying etiologies. Through case studies and interactive sessions, participants will refine their skills in early detection, risk stratification, and management strategies for patients with CKD.

Medical Category's Courses

Course Lesson(11)

Lesson 1 : **Acid Base Disorders and ABG Interpretation Introduction**

Lesson 2 : **Respiratory Acidosis**

Lesson 3 : **Respiratory Alkalosis**

Lesson 4 : **Metabolic Alkalosis**

Lesson 5 : **Metabolic Acidosis**

Lesson 6 : **Acute Kidney Injury AKI Etiology Pathophysiology Clinical Features Diagnosis Treatment**

Lesson 7 : **Hyperkalemia Etiology Pathophysiology Clinical Features Diagnosis Treatment**

Lesson 8 :
Chronic Kidney Disease CKD Etiology Pathophysiology Clinical Features Diagnosis Treatment

Lesson 9 : **Hyponatremia**

Lesson 10 : **Hypernatremia**

Lesson 11 : **Nephrolithiasis Kidney Stones**
