Mindluster Platform

About the course Systems with Python Statistical Modeling

Python's statistics is a built-in Python library for descriptive statistics. You can use it if your datasets are not too large or if you can't rely on importing other libraries. NumPy is a third-party library for numerical computing, optimized for working with single- and multi-dimensional arrays.

Programming Category's Courses

Course Lesson(7)

Lesson 1 :
Training Your Systems with Python Statistical Modeling The Course Overview | packtpub com

Lesson 2 :
Training Your Systems with Python Statistical Modeling Learning Principles | packtpub com

Lesson 3 :
Training Your Systems with Python Statistical Modeling Classifying Data in Python | packtpub com

Lesson 4 :
Training Your Systems with Python Statistical Modeling Linear Models and OLS | packtpub com

Lesson 5 : **Training Your Systems with Python Statistical Modeling The Perceptron | packtpub com**

Lesson 6 :
Training Your Systems with Python Statistical Modeling Diving into Clustering | packtpub com

Lesson 7 :
Training Your Systems with Python Statistical Modeling Objective Reduction | packtpub com
