About the course Lumbar vertebrae anatomy techniques

Lumbar vertebrae anatomy course, in this course delving into the intricacies of the lumbar spine. In this course, we will learn about the structure, function, and biomechanics of the lumbar vertebrae, including the surrounding ligaments, muscles, nerves, and blood supply. Through detailed study, students will gain a deep understanding of common pathologies and diagnostic techniques associated with lumbar spine disorders.

Medical Category's Courses

Course Lesson(21)

Lesson 1 : **Skull Anatomy Older Version**

Lesson 2 : **Skull Anatomy With Labels Updated Version**

Lesson 3 : **Sphenoid Bone Anatomy**

Lesson 4 : **Ethmoid Bone Anatomy**

Lesson 5 : **Sinus Skull Anatomy**

Lesson 6 : **Fetal Skull Fontanelles Anatomy**

Lesson 7 : **Atlas Axis Cervical Vertebrae C1 C2 Anatomy**

Lesson 8 : **Cervical Vertebrae C3 C7 Anatomy**

Lesson 9 : **Thoracic Vertebrae T1 T12 Anatomy**

Lesson 10 : **Rib and Sternum Anatomy**

Lesson 11 : **Lumbar Vertebrae L1 L5 Anatomy**

Lesson 12 : **Sacrum Anatomy**

Lesson 13 : **Coxa Pelvis Anatomy**

Lesson 14 : **Clavicle Anatomy**

Lesson 15 : **Scapula Anatomy**

Lesson 16 : **Humerus Anatomy**

Lesson 17 : **Radius and Ulna Anatomy**

Lesson 18 : **Hand Anatomy Bones of the Hand**

Lesson 19 : **Femur Anatomy**

Lesson 20 : **Tibia Fibula Anatomy**

Lesson 21 : **Foot Anatomy Bones of the Foot**
