Mindluster Platform

About the course Web Development with Angular and PHP

If you're wondering whether you can use PHP alongside Angular, the answer is yes. But Angular will still need a separate client-server architecture. In general, PHP runs on the server-side while Angular runs on the client-side .

Programming Category's Courses

Course Lesson(6)

Lesson 1 : **Web Development with Angular and PHP The Course Overview | packtpub com**

Lesson 2 : **Web Development with Angular and PHP Creating Register Page| packtpub com**

Lesson 3 : **Web Development with Angular and PHP Registration| packtpub com**
