Mindluster Platform

About the course Predictions Using Various Models

predictive modeling is a statistical technique using machine learning and data mining to predict and forecast likely future outcomes with the aid of historical and existing data. It works by analyzing current and historical data and projecting .

Programming Category's Courses

Course Lesson(5)

Lesson 1 :
scikit learn â€“Test Predictions Using Various Models The Course Overview | packtpub com

Lesson 2 :
scikit learn â€“Test Predictions Using Various Models Explore Various Repository| packtpub com

Lesson 3 :
scikit learn â€“Test Predictions Using Various Models Clustering Optimizing Assessing| packtpub com

Lesson 4 : **scikit learn â€“Test Predictions Using Various Models Cross Validation | packtpub com**

Lesson 5 :
scikit learn â€“Test Predictions Using Various Models Classify Data with a Linear SVM| packtpub com
