# About the course Eye Anatomy with Extraocular Muscles

Eye Anatomy course, in this course we will learn about the intricate structures and functions comprising the anatomy of the eye. Topics include the anatomy of the eyeball, including the cornea, iris, lens, retina, and optic nerve, as well as the accessory structures such as the eyelids, lacrimal apparatus, and extraocular muscles. Through detailed study and visualization techniques, students will gain a comprehensive understanding of how these components work together to facilitate vision and maintain ocular health.

**Medical Category's Courses**

## Course Lesson(12)

Lesson 1 : **Special Senses Eye Anatomy with Extraocular Muscles Model**

Lesson 2 : **Special Senses Ear Anatomy Model**

Lesson 3 : **Special Senses Eye Anatomy**

Lesson 4 : **Neurology Optic Nerve Cranial Nerve II Visual Pathway and Lesions**

Lesson 5 : **Special Senses Pupillary Light Accommodation Reflex**

Lesson 6 : **Special Senses Photoreceptors Rods and Cones**

Lesson 7 : **Special Senses The Phototransduction Cascade**

Lesson 8 : **Special Senses External Middle Ear Anatomy**

Lesson 9 : **Special Senses Inner Ear Anatomy**

Lesson 10 : **Special Senses Semicircular Canals Cristae Ampullaris BPPV**

Lesson 11 : **Special Senses Vestibule Maculae Utricle Saccule**

Lesson 12 : **Special Senses Cochlea Spiral Organ of Corti**
