About the course Liver Metabolism in Health

Liver Metabolism course, in this course we will learn about the intricate biochemical processes governing the liver's metabolic functions. Exploring topics such as lipid, carbohydrate, and protein metabolism, we delve into the mechanisms regulating energy production, detoxification, and drug metabolism within hepatocytes. Understanding liver metabolism is crucial for comprehending metabolic disorders and maintaining overall health.

Medical Category's Courses

Course Lesson(18)

Lesson 1 : **Gastrointestinal Teeth Anatomy**

Lesson 2 : **Gastrointestinal Salivation Parotid Submandibular Sublingual Glands**

Lesson 3 : **Gastrointestinal Deglutition Swallowing**

Lesson 4 : **Gastrointestinal Gastric Secretion The Cephalic Gastric Phase**

Lesson 5 : **Gastrointestinal Gastric Secretion The Intestinal Phase**

Lesson 6 : **Gastrointestinal Liver Histology**

Lesson 7 : **Gastrointestinal Liver Circulation Portal Hypertension**

Lesson 8 : **Gastrointestinal Liver Metabolism Protein Synthesis Storage**

Lesson 9 : **Gastrointestinal Biotransformation of Drugs and Toxins**

Lesson 10 : **Gastrointestinal Bile Synthesis**

Lesson 11 : **Gastrointestinal Types of Jaundice**

Lesson 12 : **Gastrointestinal GI Motility of the Esophagus Stomach**

Lesson 13 : **Gastrointestinal GI Motility of the Small Intestine**

Lesson 14 : **Gastrointestinal GI Motility of the Large Intestine**

Lesson 15 : **Neurology Enteric Nervous System**

Lesson 16 : **Gastrointestinal Digestion Absorption of Carbohydrates**

Lesson 17 : **Gastrointestinal Digestion Absorption Of Lipids**

Lesson 18 : **Gastrointestinal Digestion Absorption of Proteins**
