About the course Respiratory Physiology in Health

Respiratory Physiology course, in this course we will explore the intricate workings of the respiratory system, delving into the mechanics of breathing, gas exchange, and ventilation control. Through comprehensive study, we'll gain insights into the physiological processes underlying respiration in both health and disease. From understanding pulmonary circulation to the regulation of acid-base balance, this course provides a foundational understanding of how the respiratory system functions to maintain homeostasis.

Medical Category's Courses

Course Lesson(20)

Lesson 1 : **Respiratory Half Head Anatomy**

Lesson 2 : **Respiratory Mechanics of Breathing Pressure Changes Part 1**

Lesson 3 : **Respiratory Mechanics of Breathing Inspiration Part 2**

Lesson 4 : **Respiratory Mechanics of Breathing Expiration Part 3**

Lesson 5 : **Respiratory Airway Resistance**

Lesson 6 : **Respiratory Surface Tension Surfactant in Alveoli**

Lesson 7 : **Respiratory Compliance Elasticity**

Lesson 8 : **Respiratory Spirometry Lung Volumes Capacities**

Lesson 9 : **Respiratory Forced Spirometry Pulmonary Function Test Retired**

Lesson 10 : **Respiratory External Respiration Ventilation Perfusion Coupling**

Lesson 11 : **Respiratory External Respiration Thickness Surface Area of Respiratory Membrane**

Lesson 12 : **Respiratory External Respiration Partial Pressures Solubilities**

Lesson 13 : **Respiratory Internal Respiration**

Lesson 14 : **Respiratory Types of Hypoxia Hypoxemic Anemic Stagnant Histotoxic**

Lesson 15 : **Respiratory Oxygen Hemoglobin Dissociation Curve**

Lesson 16 : **Respiratory Regulation of Breathing Respiratory Centers Part 1**

Lesson 17 : **Respiratory Regulation of Breathing Central Peripheral Chemoreceptors Part 2**

Lesson 18 : **Respiratory Regulation of Breathing Factors Influencing Rate and Depth Part 3**

Lesson 19 : **Respiratory Respiration During Exercise**

Lesson 20 : **Respiratory Respiration at High Altitudes**
