Mindluster Platform

About the course Docker Fundamentals

Docker provides a set of CLI commands for managing the lifecycle of image-based containers. Docker commands span development functions such as build, export, and tagging, as well as runtime functions such as running, deleting, starting and stopping a container .

Programming Category's Courses

Course Lesson(8)

Lesson 1 : **Docker Fundamentals The Course Overview| packtpub com**

Lesson 2 : **Docker Fundamentals The Docker Platform| packtpub com**

Lesson 3 : **Docker Fundamentals Docker Registry| packtpub com**

Lesson 4 : **Docker Fundamentals Create a Container| packtpub com**

Lesson 5 : **Docker Fundamentals View Container Logs| packtpub com**

Lesson 6 : **Docker Fundamentals What is Persistent Data| packtpub com**

Lesson 7 : **Docker Fundamentals Identify the Services Needed| packtpub com**

Lesson 8 : **Docker Fundamentals What Is a Docker File| packtpub com**
