Mindluster Platform

About the course PHP Rest API Development with JWT Token

The authentication system must provide a login endpoint. Users send their credentials to the login system (which can be a third-party sign on). After a successful login, the server creates a JWT and sends it to the client. The client application must store this JWT and pass it with each subsequent API call .

Programming Category's Courses

Course Lesson(13)

Lesson 1 :
Learn PHP Rest API Development with JWT Token for Beginners 12 Install PHP JWT Library REST API

Lesson 2 :
Learn PHP Rest API Development with JWT Token for Beginners 13 Table Structure | Define Class File

Lesson 3 :
Learn PHP Rest API Development with JWT Token for Beginners 14 Create User API Method | POST

Lesson 4 :
Learn PHP Rest API Development with JWT Token for Beginners 15 Email Existence Check Register API

Lesson 5 :
Learn PHP Rest API Development with JWT Token for Beginners 16 JWT Token Structure Details

Lesson 6 :
Learn PHP Rest API Development with JWT Token for Beginners 17 Implementing Login API Method

Lesson 7 :
Learn PHP Rest API Development with JWT Token for Beginners 18 Prepare JWT Token Login API Method

Lesson 8 :
Learn PHP Rest API Development with JWT Token for Beginners 19 JWT Token Parameters concept detail

Lesson 9 :
Learn PHP Rest API Development with JWT Token for Beginners 20 Passing JWT Token to Other APIs

Lesson 10 :
Learn PHP Rest API Development with JWT Token for Beginners 21 User s Project Create API Setup

Lesson 11 :
Learn PHP Rest API Development with JWT Token for Beginners 22 User s Project Create API 2

Lesson 12 :

Learn PHP Rest API Development with JWT Token for Beginners 23 List All Projects API Method

Lesson 13 :
Learn PHP Rest API Development with JWT Token for Beginners 24 User s Respective Projects List AP
