Mindluster Platform

About the course Serverless Computing with Azure

Azure Functions is a serverless compute service that runs our code on-demand without needing to host it on the server and managing infrastructure. Azure Functions can be trigger by a variety of events. It allows us to write code in various languages, such as C#, F#, Node. js, Java, or PHP .

Programming Category's Courses

Course Lesson(6)

Lesson 1 : **Serverless Computing with Azure The Course Overview | packtpub com**

Lesson 2 :
Serverless Computing with Azure Signing Up for and Signing into the Azure Portal | packtpub com

Lesson 3 :
Serverless Computing with Azure Switching Between Consumption and App Service Plan | packtpub com

Lesson 4 : **Serverless Computing with Azure Managing Deployment Slots | packtpub com**

Lesson 5 : **Serverless Computing with Azure Enabling Application Insights | packtpub com**

Lesson 6 :
Serverless Computing with Azure Tips Concepts Help Create High Performing Functions | packtpub com
