About the course Melanoma symptoms and treatment

Melanoma symptoms course, in this course we will explore the various signs and symptoms associated with melanoma, a type of skin cancer. We'll discuss the ABCDEs of melanoma detection, including asymmetry, border irregularity, color variation, diameter changes, and evolving features. Additionally, we'll delve into less common symptoms such as itchiness, tenderness, and bleeding within a mole or lesion. Understanding these symptoms is crucial for early detection and prompt treatment, ultimately improving outcomes for individuals at risk of melanoma.

Medical Category's Courses

Course Lesson(7)

Lesson 1 : **Dermatology Lesion Terminology**

Lesson 2 : **Melanoma Overview signs and symptoms pathology risk factors treatment**

Lesson 3 : **Burns DETAILED Overview Types Pathophysiology TBSA**

Lesson 4 : **Burns Pathophysiology**

Lesson 5 :
Impetigo Bacterial Skin Infection Overview Clinical Presentation Pathophysiology Treatment

Lesson 6 :
Bacterial Skin Infection Cellulitis and Erysipelas Clinical Presentation Pathology Treatment

Lesson 7 : **Introduction to Skin Anatomy and Physiology**
