# About the course Hands On Android Application Components

An application component can be a client-side library or a server runtime block. Typical libraries might handle basic functions such as login or payments. They can also contain various elements such as non-visual runtime objects, visual components, integration adapters, and user interface screen packages.

**Programming Category's Courses**

## Course Lesson(5)

Lesson 1 :
**Hands On Android App Component Styles and Themes The Course Overview | packtpub com**

Lesson 2 :
**Hands On Android App Component Styles and Themes Get Started with Styles Theme|packtpub com**

Lesson 3 :
**Hands On Android App Component Styles and Themes Using the Material Theme | packtpub com**

Lesson 4 : **Hands On Android App Component Styles and Themes Branding | packtpub com**

Lesson 5 :
**Hands On Android App Component Styles and Themes Version Specific Styles | packtpub com**
