# About the course MongoDB Administration Programming

MongoDB Administration is a task of maintaining and managing the MongoDB. One of the most critical tasks is Database Sharding to be completed by the MongoDB Administration. The whole database is divided into smaller parts that are faster and far easily manageable and are called Data Shards.

**Programming Category's Courses**

## Course Lesson(7)

Lesson 1 : **MongoDB Administration The Course Overview | packtpub com**

Lesson 2 : **MongoDB Administration Introduction to MongoDB Replication | packtpub com**

Lesson 3 : **MongoDB Administration Election Process | packtpub com**

Lesson 4 : **MongoDB Administration Components of Sharded Cluster | packtpub com**

Lesson 5 : **MongoDB Administration Setting Up Replica Sets | packtpub com**

Lesson 6 : **MongoDB Administration Working with Journaling | packtpub com**

Lesson 7 : **MongoDB Administration Working with Aggregation Operators | packtpub com**
