About the course Anterior Cervical Discectomy and Fusion ACDF

Anterior Cervical Discectomy course, in this course we will learn about the Anterior Cervical Discectomy, a surgical procedure aimed at relieving symptoms associated with cervical disc herniation. Students will explore the anatomy of the cervical spine, surgical techniques for disc removal, indications, complications, and postoperative management strategies. Through case studies and practical demonstrations, participants will gain a comprehensive understanding of performing Anterior Cervical Discectomy to alleviate neck pain, restore nerve function, and improve overall quality of life for patients.
