Mindluster Platform

About the course Android with Docker and Jenkins

Jenkins builds a new docker image and pushes it to the Docker registry. Jenkins notifies Kubernetes of the new image available for deployment. Kubernetes pulls the new docker image from the docker registry. Kubernetes deploys and manages the docker .

Programming Category's Courses

Course Lesson(4)

Lesson 1 :
Android Continuous Integration with Docker and Jenkins The Course Overview|packtpub com

Lesson 2 : **Android Continuous Integration with Docker and Jenkins Preparation |packtpub com**

Lesson 3 :
Android Continuous Integration with Docker and Jenkins Everything start from the base |packtpub com

Lesson 4 :
Android Continuous Integration with Docker and Jenkins Introduction to CI |packtpub com
