Mindluster Platform

About the course Rendered React Application with Next js

Next. js is a widely-used framework for building React applications that offer server-side rendering, automatic code-splitting, static exporting options, and easy production builds. It also relieves a lot of the general headaches involved with creating production-ready React applications .

Programming Category's Courses

Course Lesson(7)

Lesson 1 :
Hands On Server Rendered React Application with Next js The Course Overview | packtpub com

Lesson 2 :
Hands On Server Rendered React Application with Next js Building Layout Component | packtpub com

Lesson 3 : **Hands On Server Data Fetching on Client and Server | packtpub com**

Lesson 4 :
Hands On Server Rendered React Application with Next js Hot Reloading with nodemon | packtpub com

Lesson 5 :
Hands On Server Rendered React Application with Next js CSS in JavaScript | packtpub com

Lesson 6 : **Hands On Server Rendered Create Login Form to Handle Post Request | packtpub com**

Lesson 7 : **Hands On Server Persisting User Session in Window Object | packtpub com**
