Mindluster Platform

About the course React Native Design Patterns

Higher-Order Component (or HOC) is essentially a design pattern, also known as a Decorator Pattern. In ReactJS, a HOC is a component that wraps another component by adding extra functionality or extra properties. This allows abstraction from some commonly used logic and keeps your code DRY.

Programming Category's Courses

Course Lesson(8)

Lesson 1 : **React Native Design Patterns The Course Overview | packtpub com**

Lesson 2 : **React Native Design Patterns Introduction to Styling in React Native | packtpub com**

Lesson 3 : **React Native Design Patterns Introduction to Navigation in React Native | packtpub com**

Lesson 4 : **React Native Design Patterns Introduction to Higher Order Components | packtpub com**

Lesson 5 : **React Native Design Patterns Introduction to the Render Props Pattern | packtpub com**

Lesson 6 :
React Native Design Patterns Introduction to the Compound Component Pattern | packtpub com

Lesson 7 :
React Native Design Patterns Introduction to State Management and the Context API | packtpub com

Lesson 8 : **React Native Design Patterns Introduction to Hooks | packtpub com**
