About the course Data Science Project management

Data Science Project course, in this course we will explore the intricacies of executing a successful data science project. From conceptualization to implementation, you'll learn the essential steps involved in crafting data-driven solutions. Through hands-on exercises and case studies, you'll gain practical insights into data acquisition, cleaning, analysis, and visualization. Additionally, we'll delve into project management techniques tailored specifically for data science endeavors, ensuring you're equipped with the skills to navigate complexities and deliver impactful results. By the end, you'll have the confidence and proficiency to tackle real-world data challenges effectively.

Computer Science Category's Courses

Course Lesson(3)

Lesson 1 : **Used Smartphone Price Prediction Data Science Tutorial Great Learning**

Lesson 2 : **IPL Auction Bidding Using Data science Great Learning**

Lesson 3 : **Major trends of Data science in 2023 Shorts Great Learning**
