About the course Content Delivery Network Architecture

Content Delivery Network course, in this course we will learn about Content Delivery Networks (CDNs), which are distributed networks of servers designed to efficiently deliver web content to users based on their geographic location. Participants will explore the architecture, operation, and benefits of CDNs, including improved website performance, scalability, and reliability. Topics will include CDN setup and configuration, content caching strategies, security measures, and integration with web applications. Through case studies and practical exercises, students will gain the knowledge and skills needed to implement and optimize CDNs for various online platforms and applications.

Technology Category's Courses

Course Lesson(5)

Lesson 1 : **Workflow Getting Started with Live Streaming Chapter 1**

Lesson 2 : **Interfaces Getting Started with Live Streaming Chapter 2**

Lesson 3 : **Encoders Getting Started with Live Streaming Chapter 3**

Lesson 4 : **Content Delivery Networks Getting Started with Live Streaming Chapter 4**

Lesson 5 : **Concluding Thoughts Getting Started with Live Streaming Chapter 5**
