About the course Video Shader Positioning techniques

Video Shader Positioning course, in this course we will learn about the principles and techniques of video shader positioning, which involves manipulating and controlling video shader effects within a digital environment. Participants will explore various aspects of video shader positioning, including understanding shader parameters, adjusting shader effects, optimizing positioning for visual impact, and implementing strategies for effective shader usage. Through practical exercises and hands-on demonstrations, students will develop the skills needed to position video shaders creatively and strategically to enhance visual compositions in digital media production. By the end of the course, participants will have a comprehensive understanding of video shader positioning and its applications in creating compelling visual effects.

Technology Category's Courses

Course Lesson(5)

Lesson 1 : **The Director Position Control Room Basics Chapter 1**

Lesson 2 : **The Technical Director Position Control Room Basics Chapter 2**

Lesson 3 : **The Graphics Position Control Room Basics Chapter 3**

Lesson 4 : **The Video Shader Position Control Room Basics Chapter 4**

Lesson 5 : **Control Room Basics Trailer**
