Mindluster Platform

About the course Designing Angular Web Application

The architecture of an Angular application relies on certain fundamental concepts. The basic building blocks of the Angular framework are Angular components that are organized into NgModules. NgModules collect related code into functional sets; an Angular application is defined by a set of NgModules.

Programming Category's Courses

Course Lesson(7)

Lesson 1 : **HandsOn Designing Angular Web App Architecture Course Overview | packtpub com**

Lesson 2 :
HandsOn Designing Angular Web App Architecture Ways to Organize Code | packtpub com

Lesson 3 :
HandsOn Designing Angular Web App Architecture Container Presentation Components | packtpub com

Lesson 4 :
HandsOn Designing Angular Web App Architecture Understanding State Management | packtpub com

Lesson 5 : **HandsOn Designing Angular Web App Architecture Using Functions | packtpub com**

Lesson 6 :
HandsOn Designing Angular Web App Architecture Angular CLI to Test Your Application | packtpub com

Lesson 7 :
HandsOn Designing Angular Web App Architecture Micro Frontends Using Web Components | packtpub com
