About the course Video Switcher operation basics

Video Switcher operation course, in this course we will explore the principles and techniques of operating video switchers. Participants will learn about the functions and controls of video switchers, including input selection, transitions, effects, and output routing. Through hands-on demonstrations and practical exercises, students will gain proficiency in using video switchers to switch between multiple video sources seamlessly, create smooth transitions, and enhance visual presentations. Additionally, the course will cover advanced features such as keying, layering, and graphics integration. By the end of the course, participants will have the knowledge and skills to operate video switchers effectively in various live production environments, including broadcast studios, live events, and video conferencing setups.

Technology Category's Courses

Course Lesson(3)
