Mindluster Platform

About the course Artificial Intelligence basics for Beginners

Artificial Intelligence basics course, in this course we will learn about the Artificial Intelligence basics, covering foundational concepts such as machine learning, neural networks, natural language processing, and expert systems. Students will explore the fundamental algorithms and techniques used in AI, gaining a comprehensive understanding of how AI systems work and their practical applications in various fields. Through hands-on projects and case studies, participants will develop the skills necessary to design, implement, and evaluate basic AI models, paving the way for further exploration in the field of artificial intelligence.

Artificial Intelligence Category's Courses

Course Lesson(10)

Lesson 1 : **Statistics for Data Science Probability and Statistics Statistics Tutorial Ph D Stanford**

Lesson 2 :
Machine Learning with Python Machine Learning Tutorial for Beginners Machine Learning Tutorial

Lesson 3 : **Data Science Full Course for Beginners 2023 11 Hours Data Science Tutorial**

Lesson 4 :
Python for Data Science Data Science with Python Python for Data Analysis 11 Hours Full Course

Lesson 5 : **Time Series Analysis Time Series Forecasting Time Series Analysis in R Ph D Stanford**

Lesson 6 :
Artificial Intelligence Tutorial Artificial Intelligence Tutorial for Beginners AI Full Course

Lesson 7 :
Machine Learning Tutorial Machine Learning Full Course Learn Machine Learning Great Learning

Lesson 8 :
Data Science For Beginners Learn Data Science In 9 Hours What is Data Science Great Learning

Lesson 9 :
Reinforcement Learning Tutorial Reinforcement Learning in Artificial Intelligence Full Course

Lesson 10 :
Statistics for Machine Learning Statistics Class 10 Statistics for Data Science Full Course
