Mindluster Platform

About the course Neural network fundamentals and deep learning

Neural network fundamentals course, in this course we will learn about the basics of neural networks, covering topics such as perceptrons, activation functions, backpropagation, and network architectures. You'll gain an understanding of how neural networks function and their applications in various fields like image recognition, natural language processing, and more. Through hands-on exercises and practical examples, you'll develop the skills needed to design and train neural networks effectively.

Computer Science Category's Courses

Course Lesson(4)

Lesson 1 : **Webinar Introduction to Deep Learning and Neural Networks Great Learning**

Lesson 2 :
Build Career in AI and Deep Learning with Personalized Mentorship IIT Bombay Faculty GL

Lesson 3 :
Careers in Deep Learning AI Great Lakes Mentorship by IIT Bombay Faculty Great Learning

Lesson 4 : **Deep Learning Certificate Program Mentorship by IIT Bombay Faculty Great Learning**
