About the course Natural Language Processing in AI

Natural Language Processing course in hindi, in this course we will delve into the fascinating world of Natural Language Processing (NLP). You'll learn how computers can understand, interpret, and generate human language, enabling applications like chatbots, language translation, sentiment analysis, and more. From basic linguistic concepts to advanced machine learning algorithms, this course covers the fundamentals of NLP. Through hands-on exercises and projects, you'll develop practical skills in text preprocessing, feature extraction, language modeling, and sentiment analysis. By the end of the course, you'll have a solid understanding of NLP techniques and their applications in various fields.

Computer Science Category's Courses

Course Lesson(2)

Lesson 1 : **Natural Language Processing Using Python Beginner Level Great Learning**

Lesson 2 : **Natural Language Processing in Artificial Intelligence Great Learning**
