About the course Machine Learning Methods for beginners

Machine Learning Methods course in hindi, in this course we will learn about the machine learning methods used to analyze and extract patterns from data. Topics include supervised learning techniques such as regression and classification, unsupervised learning methods like clustering and dimensionality reduction, and ensemble learning approaches. Additionally, we'll explore deep learning models such as neural networks and convolutional networks. Practical applications and hands-on exercises will solidify understanding of these methods in real-world contexts.

Artificial Intelligence Category's Courses

Course Lesson(5)

Lesson 1 : **Introduction to Decision Tree Machine Learning Tutorial for Beginners Great Learning**

Lesson 2 : **Examples of Decision Tree Machine Learning Tutorial for Beginners Great Learning**

Lesson 3 :
Entropy and Heteroginity Concept Decision Tree Tutorial Machine Learning Great Learning

Lesson 4 :
Preventing Overfitting in Decision Tree Machine Learning Tutorial For Beginners Great Learning

Lesson 5 :
Shannon s Entropy Decision Tree Machine Learning Tutorial For Beginners Great Learning
