Mindluster Platform

About the course Linear Programming fundamentals for beginners

Linear Programming fundamentals course in hindi, in this course we will delve into the core principles of Linear Programming. Explore foundational concepts such as objective functions, constraints, and decision variables. Learn techniques for formulating and solving linear optimization problems, laying a solid groundwork for tackling complex real-world challenges efficiently using mathematical modeling and optimization techniques.

Computer Science Category's Courses

Course Lesson(4)

Lesson 1 : **Introduction to Linear Programming Formulating LP Problems Tutorial Great Learning**

Lesson 2 :
Linear Programming Using Graphical Methods 2 Decision Variables Tutorial Great Learning

Lesson 3 :
Sensitivity Analysis Linear Programming With Excel Solver Analysis and Interpretation Tutorial

Lesson 4 : **Linear Programming LP With Excel Solver Hands On MS Excel Tutorial Great Learning**
