About the course Deep Learning in Natural Language Processing

Deep Learning in Natural Language course in hindi, in this course we will learn about the application of deep learning techniques in natural language processing tasks. Explore neural network architectures such as recurrent neural networks (RNNs) and transformers. Dive into sentiment analysis, named entity recognition, machine translation, and other NLP tasks using state-of-the-art deep learning models. Gain practical skills in text processing, feature engineering, and model evaluation to tackle real-world NLP challenges effectively.

Computer Science Category's Courses

Course Lesson(3)

Lesson 1 :
What is Hadoop and Parallel Processing Hadoop Tutorial for Beginners Big Data Great Learning

Lesson 2 :
Deep Learning in Natural Language Processing Analytics Masterclass Tutorial Great Learning

Lesson 3 :
Asia s First Agriculture Information System Webinar Agrisk Data Analytics Great Learning
