About the course Machine Learning using Python for Beginners

Machine Learning using Python course in hindi, in this course we will explore the fundamentals of machine learning using Python. Covering key concepts, algorithms, and practical applications, students will gain hands-on experience in building machine learning models. From data preprocessing to model evaluation, dive into the world of Python-based machine learning to develop valuable skills for tackling real-world problems efficiently.

Computer Science Category's Courses

Course Lesson(8)

Lesson 1 : **What is Machine Learning Part 1 Machine Learning With Python Tutorial for Beginners**

Lesson 2 :
ML Packages Pandas NumPy Scikit learn Part 2 Machine Learning With Python Tutorial for Beginners

Lesson 3 :
Supervised Machine Learning Part 3 Machine Learning With Python Tutorial for Beginners

Lesson 4 :
Unsupervised Machine Learning Part 4 Machine Learning With Python Tutorial for Beginners

Lesson 5 :
Principal Component Analysis Part 5 Machine Learning With Python Tutorial for Beginners

Lesson 6 :
Applications of Machine Learning Part 6 Machine Learning With Python Tutorial for Beginners

Lesson 7 : **Live Masterclass on Movie Recommendation System**

Lesson 8 : **Linear Regression Machine Learning Linear Regression in R Linear Regression in Python**
