Mindluster Platform

About the course Building Artificial Neural Network using R

Building Artificial Neural Network course in hindi, in this course e will learn about the fundamentals of building artificial neural networks (ANNs). From understanding the basic architecture to advanced techniques, students will explore various algorithms, activation functions, and optimization methods. Topics include perceptrons, backpropagation, deep learning, and practical applications. Gain hands-on experience in designing and training ANNs for tasks like image recognition, natural language processing, and more. Dive into the world of neural networks and unleash their potential in solving complex problems efficiently.

Computer Science Category's Courses

Course Lesson(5)

Lesson 1 :
Understanding the Machine Learning Techniques Supervised and Unsupervised Learning Tutorial

Lesson 2 :
Applications of Supervised Learning Machine Learning Tutorial for Beginners Great Learning

Lesson 3 :
Biological Neural Network and Artificial Neural Network Machine Learning Tutorial Great Learning

Lesson 4 : **Building Artificial Neural Network using R Machine Learning Tutorial Great Learning**

Lesson 5 :
What is Machine Learning and Its Applications Machine Learning Tutorial Great Learning
