Mindluster Platform

About the course Hierarchical clustering fundamentals

Hierarchical clustering course in hindi, in this course we will learn about hierarchical clustering, a technique in data analysis and machine learning. Hierarchical clustering involves dividing a dataset into nested groups based on similarity. We'll explore both agglomerative and divisive methods, understanding how to assess similarity using distance metrics. Through practical examples, we'll grasp the applications of hierarchical clustering in pattern recognition, data visualization, and understanding data structures.

Computer Science Category's Courses

Course Lesson(5)

Lesson 1 :
Grow Your Business with Analytics Analytics for Business Analytics Uses for Small Businesses

Lesson 2 :
5 Analytics Techniques You Must Learn Today Cluster Analysis Regression Analysis Great Learning

Lesson 3 : **Applications of Analytics and Obstacles to Analytics by Ashok R Sankethi Great Learning**

Lesson 4 : **Importance of Business Acumen Ashok R Sankethi Great Learning**

Lesson 5 :
Fundamentals of Hierarchical Clustering What is Agglomerative Clustering Great Learning
