Mindluster Platform

About the course Catia V5 Basics

As catia has a total of 108 workbenches, it is very hard to learn all. Being a mechanical engineer we mainly need part modelling, product modelling and assembly, for creating models. Part modelling is easier in catia but product modelling is hard.

Graphic Design Category's Courses

Course Lesson(16)

Lesson 1 : **000 catia v5 basics**

Lesson 2 : **Basics part I Catia v5 Training Basic rules for modelling**

Lesson 3 : **Basics part II Catia v5 Training Basic rules for modelling Projecting 3d elements**

Lesson 4 : **Basics part III Catia v5 Training Basic rules for modelling Autoconstraints**

Lesson 5 : **Basics part IV Catia v5 Training Axis systems**

Lesson 6 : **Basics part V Catia v5 Training Lock and unlock filter**

Lesson 7 : **Basics part VI Catia v5 Training Axis system vs projected h v direction in sketch**

Lesson 8 : **Basics part VII Catia v5 Training Add favorites to search**

Lesson 9 : **Basics part VIII Catia v5 Training Configuration and Customization**

Lesson 10 : **Breakout view Catia v5 Drafting quick basic All about breakout views**

Lesson 11 : **Broken view Catia v5 drafting quick basic All about broken views**

Lesson 12 : **Restore Reset toolbars Catia v5 Training Tools customize**

Lesson 13 : **How to enter Admin Mode Catia v5 Training Basics**

Lesson 14 : **Bend Annotations Catia v5 Training Basics Drafting**

Lesson 15 : **Reference Planes Catia v5 Training Basics**

Lesson 16 : **Sketch Analysis Catia v5 Training Basics**
