About the course EP testing fundamentals

EP testing course in hindi, in this course is a comprehensive course covering various neurophysiological assessments. Participants delve into Electroencephalogram (EEG), Electromyography (EMG), Nerve Conduction Studies (NCS), Visual Evoked Potentials (VEP), Auditory Brainstem Response (ABR), Somatosensory Evoked Potentials (SSEP), Polysomnography (PSG), and Intraoperative Neuromonitoring (IONM). Through this course, learners explore testing methodologies, interpretation techniques, and clinical applications of EP testing in diagnosing neurological and neuromuscular disorders. Gain insights into the role of EP testing in evaluating the integrity of the central and peripheral nervous systems, aiding in the diagnosis and management of conditions such as epilepsy, neuropathies, neuromuscular disorders, and sleep-related disorders. This comprehensive curriculum equips healthcare professionals with the essential knowledge and skills to conduct and interpret EP tests effectively, enhancing patient care and outcomes in clinical practice.

Medical Category's Courses

Course Lesson(3)

Lesson 1 : **What Blood Test Can Detect Diseases Dr Soumya Bhattacharya Apollo 24 7**

Lesson 2 : **One Test Every Man Should Get in His 50s Dr Debmalya Gangopadhyay**

Lesson 3 : **What is an EP Test Dr Suchit Majumder**
