About the course Matter in our surroundings in chemistry

Matter in our surroundings course, in this course we will learn about the matter that constitutes the world around us. We delve into the fascinating study of solids, liquids, and gases, exploring their properties, behavior, and transformations under varying conditions like temperature and pressure. Through the lens of chemistry and physics, we uncover the principles governing the states of matter and the phenomena associated with them, such as evaporation, condensation, and sublimation. Additionally, we explore essential laws like Boyle's Law and Charles's Law, which provide insights into the relationships between volume, pressure, and temperature of gases. Understanding matter in our surroundings is crucial not only for academic knowledge but also for practical applications in fields ranging from engineering to environmental science. Join us on this educational journey to gain a deeper appreciation of the matter that shapes our world and its impact on our daily lives.

Science Category's Courses

Course Lesson(2)

Lesson 1 : **Class 9 Science Book Overview and Complete Strategy CBSE 2024 25**

Lesson 2 :
Matter in Our Surroundings Chapter Overview Class 9 Chemistry Chapter 1 CBSE 2024 25
