About the course Large Language Models Risks

Large Language Models course, in this course we will embark on an exploration of Large Language Models, cutting-edge artificial intelligence systems revolutionizing natural language processing. Large Language Models, or LLMs, represent a breakthrough in deep learning, enabling machines to understand and generate human-like text with unprecedented accuracy and fluency. Throughout this course, we will delve into the architecture, capabilities, and applications of LLMs, uncovering their potential to transform various domains, from content generation and translation to sentiment analysis and conversational agents. We will examine the underlying principles of LLMs, including pre-training techniques, fine-tuning strategies, and ethical considerations. Through hands-on exercises and real-world examples, you will gain practical skills in leveraging LLMs to tackle diverse linguistic tasks and enhance human-computer interaction. By the end of the course, you will be equipped with the knowledge and tools to harness the power of Large Language Models and drive innovation in natural language processing.

Artificial Intelligence Category's Courses

Course Lesson(13)

Lesson 1 : **How Large Language Models Work**

Lesson 2 : **What is Prompt Tuning**

Lesson 3 : **Risks of Large Language Models LLM**

Lesson 4 : **Why Large Language Models Hallucinate**

Lesson 5 : **AI and Large Language Models Boost Language Translation**

Lesson 6 : **Large Language Models Are Zero Shot Reasoners**

Lesson 7 : **Should You Use Open Source Large Language Models**

Lesson 8 : **Hypnotized AI and Large Language Model Security**

Lesson 9 : **What is a Chatbot**

Lesson 10 : **Do Chatbots Need AI**

Lesson 11 : **How Chatbots Could Be Hacked by Corpus Poisoning**

Lesson 12 : **Open Source in Action with watsonx**

Lesson 13 : **3 Benefits of Chatbots for Customer Service**
