Mindluster Platform

About the course Cloud Native devOps technologies

Cloud Native devOps course, in this course we delve into the intersection of cloud-native technologies and DevOps practices. Starting with an exploration of Cloud Native DevOps fundamentals, participants gain insight into deploying, managing, and scaling applications in cloud environments efficiently. Through hands-on sessions, we navigate the key tools and methodologies vital for seamless integration, continuous delivery, and automated operations within cloud-native ecosystems. From containerization techniques to orchestrating workflows with Kubernetes, this course equips learners with the skills needed to architect robust, scalable, and resilient cloud-native systems.

Computer Science Category's Courses

Course Lesson(6)

Lesson 1 : **What is Serverless**

Lesson 2 : **PaaS Explained**

Lesson 3 : **IaaS Explained**

Lesson 4 : **Cloud Native DevOps Explained**

Lesson 5 : **Tech Talk ArgoCD Tekton Better GitOps**

Lesson 6 : **GitOps and Cloud Adoption You Need Both**
