Mindluster Platform

About the course Logo Programming for beginners

Logo Programming course, in this course will embark on an exciting journey into the world of coding through the lens of Logo, a beginner-friendly programming language. This course introduces learners to the fundamentals of Logo Programming, emphasizing hands-on practice and creative exploration. Participants will learn to command a virtual turtle, guiding it to draw intricate shapes and patterns on the screen. Starting with basic commands, such as moving forward, turning, and lifting the pen, learners will progress to more complex concepts like loops and conditional statements, empowering them to create sophisticated graphics and animations. Through interactive exercises and projects, participants will develop problem-solving skills and computational thinking while gaining confidence in their coding abilities. Whether you're a complete beginner or have some programming experience, Logo Programming offers an engaging and accessible introduction to the world of coding. Join us and unleash your creativity with Logo

Programming Category's Courses

Course Lesson(9)

Lesson 1 : **IPO Cycle**

Lesson 2 : **Storage Devices**

Lesson 3 : **Windows OS**

Lesson 4 : **Windows Operating System**

Lesson 5 : **What is Internet**

Lesson 6 : **What is world wide web**

Lesson 7 : **Logo Programming**

Lesson 8 : **Logo Commands**

Lesson 9 : **KolourPaint Tutorial for Beginners**
