Mindluster Platform

About the course SolidWorks surface modeling basics

SolidWorks surface modeling basics course, in this course participants will explore the fundamental techniques and tools used for surface modeling in SolidWorks, a powerful 3D CAD software. The course covers the essentials of creating and manipulating complex surfaces, which are crucial for designing aesthetically focused and intricate parts that standard solid modeling can't handle effectively. Learners will gain proficiency in using tools like Boundary Surface, Lofted Surface, and Sweep to create sophisticated designs. Practical assignments will help solidify skills by applying them to real-world modeling scenarios. This course is ideal for CAD designers and engineers looking to enhance their modeling capabilities in product design and development.

Engineering Category's Courses

Course Lesson(9)

Lesson 1 : **SolidWorks Tutorial for Beginners 1**

Lesson 2 : **SolidWorks Sketch Practice Tutorial for Beginners**

Lesson 3 : **SolidWorks Tutorial for Beginners 2A**

Lesson 4 : **SolidWorks Tutorial for Beginners 2B**

Lesson 5 : **SolidWorks Basic Practice Drawing Exercise for Beginners 1**

Lesson 6 : **SolidWorks Basic Practice Drawing Exercise for Beginners 2**

Lesson 7 : **SolidWorks Plane Between Two Points**

Lesson 8 : **SolidWorks Surface Modeling Basics Tutorial for Beginners 1**

Lesson 9 : **SolidWorks Advanced Modeling Tutorial**
