Mindluster Platform

About the course AutoLISP programming for beginners

AutoLISP programming course, in this course participants will immerse themselves in the intricacies of customizing and extending the functionality of AutoCAD through coding. AutoLISP serves as the backbone for creating custom commands, automating repetitive tasks, and enhancing productivity within AutoCAD environments. Throughout the course, learners will delve into the fundamentals of AutoLISP syntax, data types, variables, and control structures, gradually progressing towards more advanced topics such as functions, error handling, and debugging techniques. By dissecting real-world examples and practical exercises, participants will gain a solid understanding of how to harness the power of AutoLISP to tailor AutoCAD to specific project requirements. Whether you're a novice programmer or seasoned CAD user, this course provides a structured pathway to mastering AutoLISP, empowering you to unlock new levels of efficiency and creativity in your AutoCAD workflows.

Programming Category's Courses

Course Lesson(3)

Lesson 1 : **What is AutoLISP in AutoCAD What is the use of AutoLISP in AutoCAD**

Lesson 2 : **AutoLISP Programming Tutorial for Beginners 1 Part 1 of 2**

Lesson 3 : **AutoLISP Programming Tutorial for Beginners 1 Part 2 of 2**
