Mindluster Platform

About the course Core web vitals essentials

Core web vitals course, in this course explore the fundamental metrics that measure user experience on the web, focusing on speed, responsiveness, and stability. This comprehensive program delves into key metrics such as Largest Contentful Paint (LCP), First Input Delay (FID), and Cumulative Layout Shift (CLS). Participants learn how to interpret these metrics, identify performance issues on their websites, and implement strategies to optimize web performance accordingly. Through practical demonstrations and case studies, learners gain insights into improving user experience and enhancing website performance to meet the Core Web Vitals benchmarks set by Google. Whether you're a web developer, designer, or site owner, this course equips you with the knowledge and tools needed to ensure a seamless and efficient user experience on the web.
