Mindluster Platform

About the course Inside Azure Management

Course Presenter : Inside Cloud and Security

Inside Azure Management course provides in-depth insights into the tools, services, and best practices for effective management of Azure resources. Participants will learn about Azure Portal, Resource Manager, monitoring, governance, security, automation, and cost optimization. Gain the knowledge to effectively manage and administer Azure deployments, monitor performance, enforce compliance, enhance security, automate tasks, and optimize costs. Join this course to unlock the power of Azure Management and maximize the efficiency, reliability, and security of your cloud infrastructure. Stay ahead in the dynamic world of Azure management with Inside Azure Management course. Inside Cloud and Security

Computer Science Category's Courses

Course Lesson(11)

Lesson 1 : **Securing Kubernetes**

Lesson 2 : **Setting Up Your Local Kubernetes Environment**

Lesson 3 : **The Ticking Time Bomb Simple hacker techniques that cause major cyber incidents**

Lesson 4 : **AIFOREVERYONE Predictive Maintenance Using Cognitive Vision**

Lesson 5 : **AIFOREVERYONE Predictive Maintenance Using Cognitive Vision**

Lesson 6 : **Azure Policy Insights Multi tag Demo via Azure Policy**

Lesson 7 : **Inside Azure Governance You in Control**

Lesson 8 : **Building a YAML Build Pipeline for an AKS Cluster**

Lesson 9 : **Exploring Configuration Management in Azure**

Lesson 10 : **Getting Started with Azure Migrations**

Lesson 11 : **Intro to AI Detecting and Analyzing Faces with the Face API**
