Mindluster Platform

About the course Cybersecurity

Course Presenter : Inside Cloud and Security

Cybersecurity course equips participants with essential knowledge and skills to protect digital systems and data from cyber threats. Explore various cybersecurity domains, including network security, application security, endpoint security, data security, and cloud security. Learn about threat detection, incident response, vulnerability assessment, and risk management. Gain practical insights into implementing security controls, secure coding practices, and security best practices. Join this course to enhance your cybersecurity proficiency, mitigate risks, and safeguard organizations from evolving cyber threats in today's digital landscape. Inside Cloud and Security

Computer Science Category's Courses

Course Lesson(4)

Lesson 1 : **Distilling the Microsoft Cybersecurity Reference Architecture**

Lesson 2 : **Securing Kubernetes**

Lesson 3 : **The Ticking Time Bomb Simple hacker techniques that cause major cyber incidents**

Lesson 4 : **Azure Monitor Design and implement a monitoring solution with ARM and CI CD**
