About the course OSINT

Course Presenter : Prabh Nair

Yes, OSINT (Open Source Intelligence) is generally legal when conducted within the boundaries of applicable laws and regulations. OSINT refers to the collection, analysis, and use of publicly available information from open sources, such as websites, social media platforms, public records, news articles, and other publicly accessible information. The legality of OSINT activities depends on the specific jurisdiction and the purpose for which the information is being collected. It is essential to understand and comply with relevant laws and regulations related to privacy, data protection, intellectual property rights Prabh Nair
