About the course Data Science types

Data Science types course, in this course we will learn about the various types of Data Science, focusing on the distinct methodologies and applications within the field. We will explore key areas such as descriptive, diagnostic, predictive, and prescriptive analytics, understanding their unique roles and how they contribute to data-driven decision-making. The course covers fundamental techniques, tools, and real-world applications, providing a comprehensive overview of each type. By the end, participants will be equipped to apply these data science types effectively in various scenarios.

Computer Science Category's Courses

Course Lesson(3)

Lesson 1 : **Data Science Machine Learning Fundamentals Part 1**

Lesson 2 :
Types of Data Science and Machine Learning Models Data Science and Machine Learning Part 2

Lesson 3 : **Regression Data Science Machine Learning Fundamentals Part 3**
