About the course Secure Mobile Devices and Technology

Course Presenter : Louay Karadsheh, PhD, CISSP, CEH, CASP

Secure Mobile Devices and Technology course focuses on ensuring the security of mobile devices. Explore techniques for securing smartphones, tablets, and wearable devices. Learn about secure app development, mobile device management, data encryption, and secure communication protocols. Develop skills to protect against mobile threats, such as malware and data breaches. Join this course to enhance your understanding of securing mobile devices and technology in today's digital landscape. Louay Karadsheh, PhD, CISSP, CEH, CASP

Computer Science Category's Courses

Course Lesson(14)

Lesson 1 : **Chapter 1 The Evolution of Data Communication**

Lesson 2 : **Chapter 2 History of Cellular Technologies**

Lesson 3 : **Chapter 3 Role of Mobile Technology in the Modern World**

Lesson 4 : **Chapter 5 Working Principle of Major Wireless Network**

Lesson 5 : **Chapter 6 Working Principle of Cellular Network**

Lesson 6 : **Chapter 8 Security Threats in IoT Ecosystems**

Lesson 7 : **Chapter 4 Mobile Security in Perspective**

Lesson 8 : **Chapter 7 Types of Mobile Security Threats**

Lesson 9 : **Chapter 9 Security Mobile Devices from Physical Cyber Threats**

Lesson 10 : **Chapter 10 Mobile Password Management**

Lesson 11 : **Chapter 12 Securing Shopping Through Mobiles**

Lesson 12 : **Chapter 13 World of Mobile Apps**

Lesson 13 : **Chapter 11 Security Wireless Network Communication**

Lesson 14 : **Chapter 14 Mobile Wireless Technology and Security Standards**
