About the course Vulnerability Scanning

Course Presenter : Louay Karadsheh, PhD, CISSP, CEH, CASP

Vulnerability Scanning course focuses on identifying and assessing potential weaknesses in computer systems and networks. Discover techniques for vulnerability identification, scanning tools, and vulnerability databases. Learn to analyze scan results, prioritize vulnerabilities, and implement effective mitigation strategies. Join this course to enhance your understanding of vulnerability scanning and bolster your ability to protect systems from potential security risks. Louay Karadsheh, PhD, CISSP, CEH, CASP

Computer Science Category's Courses

Course Lesson(5)

Lesson 1 : **Nessus Using Advanced Scanning**

Lesson 2 : **Nessus Vulnerability Scanner Host Discovery**

Lesson 3 : **OpenVAS Vulnerability Scanner Installation Configuration Updating and Scanning**

Lesson 4 : **Nikto Web Vulnerability Scanner**

Lesson 5 : **Nessus Web Application Test How Hackers Exploit Web Sites Vulnerabilities**
