Mindluster Platform

About the course Nmap

Course Presenter : Louay Karadsheh, PhD, CISSP, CEH, CASP

Nmap course delves into the powerful network scanning tool. Explore various scan types, port scanning techniques, and network reconnaissance. Learn to identify open ports, discover hosts, and gather information about network services. Develop skills in Nmap scripting, advanced scanning options, and result analysis. Join this course to master Nmap and enhance your ability to conduct comprehensive network assessments and strengthen security measures. Louay Karadsheh, PhD, CISSP, CEH, CASP

Computer Science Category's Courses

Course Lesson(5)

Lesson 1 : **Nmap Scanning Techniques**

Lesson 2 : **Nmap Service and OS Detection**

Lesson 3 : **Nmap Port Scanning**

Lesson 4 : **Nmap Host Discovery**

Lesson 5 : **Nmap Scripting Beginner Guide**
