About the course Web Exploitation

Course Presenter : hexdump

Web Exploitation course focuses on the techniques and methodologies used to identify and exploit vulnerabilities in web applications. Explore common web vulnerabilities such as SQL injection, cross-site scripting (XSS), and insecure direct object references. Learn about web application security testing, penetration testing, and secure coding practices. Enhance your skills in identifying and mitigating web application vulnerabilities with the Web Exploitation course. hexdump

Computer Science Category's Courses

Course Lesson(13)

Lesson 1 : **Introduction to Web Exploitation**

Lesson 2 : **Getting used to BurpSuite**

Lesson 3 : **SQL Injections**

Lesson 4 : **Directory Traversals**

Lesson 5 : **File Inclusion Local Remote**

Lesson 6 : **File Upload Vulnerabilities**

Lesson 7 : **Command Injections**

Lesson 8 : **Cross Site Scripting Stored Reflected and DOM**

Lesson 9 : **Web Enumeration â€“ Files and Directories**

Lesson 10 : **Web Enumeration â€“ Virtual Hosts**

Lesson 11 : **Web Enumeration â€“ Fuzzing for HTTP Parameters Enumeration**

Lesson 12 : **Brute Force Attacks**

Lesson 13 : **DNS Zone Transfer Attacks**
